

ORDER & PRODUCTION PLANNING

ControlTex®

LBS®

Laundry Business
Systems

FEATURES

Generate orders by facility based on usage or standards:

- Includes order creation for bulk and exchange carts.

- Order adjustment capability.

Several order printing options to match laundry process:

- Print by summary, item group or automatically split the order into individual tickets based on cart size.

Report linen fill rates by customer and item.

Provide laundry production forecasts.

&

Improved supply chain efficiency by creating orders based on customer utilization.

Reduced administrative time:

- Orders are automatically generated, electronically adjusted and automatically printed.

Improved data accuracy:

- Each order contains a barcode signifying the customer, date, and pertinent information used in the shipping process.

Electronically tracked order and shipping information enables fill rate reporting and quantifiable customer service measurements.

Production forecasts facilitate informed production decisions.

BENEFITS
